## ASX Announcement

---

# Appointment of Key Exploration Consultants

---

- **Marenica adds exploration and management experience to the team**
- **Jessica Bezuidenhout appointed as General Manager - Namibia**
- **Berti Roesener appointed as Consulting Exploration Manager - Namibia**
- **David Princep appointed as Consulting Geologist**

Marenica Energy Limited (“Marenica”, “The Company”, ASX:MEY) is pleased to announce several key additions to its exploration team, they will support the expansion of exploration activities on Marenica’s large uranium tenement position in Namibia and on its extensive Australian uranium tenements and deposits (the later subject to completion of the acquisition from Optimal Mining Limited “Optimal”).

Jessica Bezuidenhout has been appointed “General Manager - Namibia”. Ms Bezuidenhout will be responsible for overseeing the smooth running of the Namibian operations. Ms Bezuidenhout is an environmental scientist with 13 years exploration and mining experience in Australia and Namibia, she will ensure that exploration activities are completed under the most efficient and optimal conditions. Ms Bezuidenhout is a valuable addition to lead the team.

Berti Roesener has been appointed “Consulting Exploration Manager - Namibia”. Mr Roesener is a geologist with over 33 years geological experience in Namibia, in particular, on the mineralisation type targeted by Marenica, being calcrete hosted uranium mineralisation. Mr Roesener is author of the uranium chapter of the book on “Mineral Resources of Namibia”.

Dave Princep has been appointed “Consulting Geologist” and will oversee, from a technical point of view, all planning, execution and analysis of exploration activities in Namibia. Like Mr Roesener, Mr Princep has extensive experience on exploration for calcrete hosted uranium mineralisation and mining in Namibia, having worked for Paladin Energy Limited (“Paladin”) and Deep Yellow Limited on their projects in Namibia, over the last 16 years. Whilst working at Paladin, Mr Princep also prepared or oversaw the mineral resource estimates on the majority of the Australian tenements to be acquired from Optimal (as they were previously owned by Paladin) and therefore, he has invaluable knowledge of these assets.

Marenica Managing Director Murray Hill said, “The addition of these highly experienced personnel to the Marenica exploration team, will support the acceleration in our exploration activities.

With a combined 80 years of exploration and development experience we welcome these consultants to the team at an exciting time for the Company.”
